Experience

Pinterest, San Francisco, CA   2024-Present
Senior Software Engineer on the Web Platform team.

Qualified.com, San Francisco, CA   2022-2024
Senior Software Engineer spearheading new design system and frontend architecture used by 25+ engineers and 2K+ B2B customers, enhancing UI consistency, cutting development time, and minimizing UI bugs.

- Led creation of design system with 30+ components and the migration from 4 years of legacy components.
- Enabled onboarding of large customers like Asana, Box, and Similarweb by resolving app-wide performance bottlenecks, migrating off of Apollo GraphQL onto Urql and Mobx.
- Rearchitected core chatbot widget to support highly customizable themes used by 90%+ of customers.
- Mentor 3 engineers, 2 of which have been promoted (1 to senior, 1 to mid-level).
- Skills: Typescript, Javascript, React, HTML, CSS, design systems, accessibility, web performance.

Gusto, San Francisco, CA   2019-2022
Senior Software Engineer (2021-2022) on Design Systems building beautiful UI components used by 200+ engineers. See Autocomplete, SelectableCard, Timeline, Heading, and SegmentedControl for a few.

- Built accessibility dashboard used by 40+ teams to identify and track accessibility improvements across the app.
- Hosted an interactive training for 200+ engineers, addressing accessibility, updated EPD processes, and tooling.
- Skills: Typescript, Javascript, React, HTML, CSS, design systems, accessibility.

Software engineer (2019-2021) on Financial Products leading org-wide initiatives, serving as a frontend and GraphQL expert across 200+ engineers, and shipping products that help customers build financial wellness.

- Pioneered a universal performance dashboard adopted by all teams to meet executive driven goals. See blog.
- Reduced user dead name usage by ~80% by leading 12 mission volunteers in a company wide name migration.
- Reduced Customer Support tickets by ~95% for loan recovery by building a self-serve payment portal.

Dolomite, Philadelphia, PA   2018-2019
Backend Tech Lead building a 0 to 1 seed-funded cryptocurrency exchange at ~$2million/month trade volume.

- Led API architecture for cryptocurrency exchange and metrics product.
- Mentored 2 junior developers into expert backend developers, later growing into senior roles at larger companies.
